5x5 TELECOM
INTERNET, CYBER, EDGE AI & MANAGED SERVICES

Solution brief · Building owners

Lower OpEx and faster move-ins for your building

5x5 Telecom lowers your building's operating costs, moves tenants in faster, keeps the building network secure and systems online, and brings better services to your tenants.

FEATURED PROGRAM · 5x5tele.com/move-in-ready-suites

First Connect by 5x5: The OpEx & Leasing Advantage

Quick move-ins and lower building costs, solved together. We coordinate the cabling and put network hardware and Wi-Fi into vacant suites, with $0 OpEx for the building. Because 5x5 is the carrier, service is already on when the tenant moves in, and nearly every tenant stays with 5x5.

Why owners choose 5x5

Lower building expenses

We audit the building's internet and telecom expenses and propose a solution that typically saves $500 to $3,000 a month. You see the savings before you commit.

Faster move-ins

With First Connect, service is already on when the tenant arrives. Other tenant installs typically take days, not weeks or months.

A secure network, systems online

Managed firewalls, security testing and 24/7 monitoring protect the building network and keep its systems running.

What we provide

Building network

- First Connect move-in ready suites
- Full building network management
- Fiber backbone installation
- Building-wide Wi-Fi
- Connected Square Footage™
- Cellular carrier offload and private CBRS / LTE

Building systems and security

- One secure network for every building system
- Cybersecurity and security testing
- Access control, AI camera security and intercoms
- POTS line replacement for elevators, fire alarms and water sensing

Costs, planning and tenants

- Telecom expense audit
- Consulting and technology planning
- Business continuity and disaster recovery support
- Internet, managed IT, cybersecurity and voice for tenants

How it works

Tell us about your property

Tell us about your property, your tenants and the building network you need.

Survey and plan

We review the property, existing infrastructure and service needs, and develop a plan with your team.

Install and manage

We install, test and activate the network, then manage it around the clock.

Bring 5x5 to your building

Tell us about your property and we will be in touch to talk through options for your tenants and your building.
