5×5 TELECOM
INTERNET, CYBER, EDGE AI & MANAGED SERVICES

Solution brief · Managed services

Managed services from the team that runs your network

5x5 Telecom manages business networks, devices and cloud services, with support tailored to your operations and service agreement.

Why businesses choose 5x5

One team owns the problem

Because 5x5 also runs your internet connection, one team owns the whole problem, with no finger-pointing between your IT company and your carrier.

Support that answers

US-based support team. First reply within 60 minutes.

A clear scope

Every service we manage is listed in your service agreement, so you know exactly what is covered.

What we provide

Network and remote access

- Managed LAN and Wi-Fi
- SASE and secure remote access
- Private CBRS / LTE

People and devices

- Managed desktop, priced per user
- Help desk and co-managed IT
- Onboarding, offboarding and mobile device management

Cloud, backup and edge

- Microsoft 365, Teams and Google for Business
- Backup and recovery, plus business continuity and disaster recovery support
- Colocation, edge computing and edge AI

How it works

Free IT consultation

We look at your current setup and the age of your hardware, ask a few questions about how you work, and share general recommendations.

Agree on the scope

We propose a managed services plan and list the systems and services we will manage in your service agreement.

We take it from there

We set up management of your network, devices and cloud services, supported 24/7.

Book a free IT consultation

We look at your current setup, ask a few questions and share general recommendations. Hands-on work is scoped in the plan we propose.
