5x5 TELECOM
INTERNET, CYBER, EDGE AI & MANAGED SERVICES

Solution brief · Businesses with many locations

Internet, phones and IT for every location, from one team

5x5 Telecom connects your offices, links them into one managed network and supports every site from one team. Each location gets the connection that fits its building, with the same settings, the same protection and one number to call.

One network instead of many providers

When every office has its own provider

Sites added one at a time end up with different contracts, equipment and settings, and no one who sees the whole network when something breaks.

One provider for every location

We provide the internet at each location, link the sites, manage the network and its cybersecurity, and support it all with one 24/7 US-based team.

Why businesses choose 5x5

The right connection at each site

Fiber, fixed wireless or 5G and 4G LTE, matched to each building, with private links between sites.

One managed network

SD-WAN with consistent settings at every location, and a managed firewall at each site or SASE for staff anywhere.

99.999% availability in writing

For SLA-backed services, we commit to at least 99.999% network availability, subject to the SLA.

What we provide

Connect every site

- Dedicated internet access
- Fixed wireless
- 5G and 4G LTE service
- Business Ethernet transport
- SD-WAN

Protect every site

- Managed firewall/router
- SASE for staff anywhere
- Email security
- Network monitoring and 24/7 support
- Phishing and social engineering protection and training

Run every site

- Managed Wi-Fi
- Calls over your internet connection
- Keep your numbers
- Managed desktop and help desk
- Microsoft 365
- Backup and recovery

How it works

Send your locations

List each address and what happens there.

Get one plan

A connection for each building, linked and protected, in one free custom quote.

Connect each site

We install each location and bring it onto your managed network.

One team supports it

24/7 US-based support for every location, with one number to call.

Bring every location under one team

Send us your addresses and we put together a free custom quote for every site.
