Solution brief · POTS line replacement for buildings

Move your building's POTS lines off copper

Carriers are retiring copper POTS lines and raising prices on the ones that remain. 5x5 Telecom replaces the lines your elevator phones, fire alarm panels and other building systems depend on.

Replace POTS lines before they fail, before rates rise and before service ends

Waiting until a line fails

The system behind it can no longer call out. That can mean an elevator entrapment with no working phone, a fire watch until monitoring is restored, a failed fire inspection or a certificate of occupancy at risk.

Replacing them with 5x5

We find every line, replace each one with the right connection and battery backup, and work with your existing monitoring company. Every system is tested before its POTS line is canceled.

Why buildings choose 5x5

Every line found

You do not need a complete list to start. We find every POTS line in the building and what it serves.

Vendors and inspector coordinated

We confirm what each system needs with your vendors and local inspector, subject to national and local codes and ordinances.

Keep your monitoring company

Replacements work with your existing monitoring company. US-based support team. First reply within 60 minutes.

What we provide

Systems we replace lines for

- Elevator emergency phones
- Fire alarm panels
- Security and burglar alarm panels
- Water and leak sensors
- Emergency call boxes
- Intercoms and gate and door entry phones

Replacement connections

- VoIP adapters
- Cellular, LTE and 5G
- Internet connections
- Battery backup

Around the replacement

- Monitoring company coordination
- Testing before each line is canceled
- Telecom expense audit
- 24/7 US-based support

How it works

Find every line

We find every POTS line and the system it serves.

Confirm what each needs

We check with your vendors and local inspector.

Replace and test

Each system is tested before its POTS line is canceled.

We support it

Our 24/7 US-based team supports every system.
