5×5 TELECOM
INTERNET, CYBER, EDGE AI & MANAGED SERVICES

Solution brief · Managed SASE

Managed SASE: the same protection wherever staff work

5x5 Telecom combines SD-WAN with cloud-based security, so staff in the office, at home or on the road connect through the same protections, managed by the team that runs your network.

Why businesses choose 5x5

The same protection everywhere

Staff get the same security in the office, at home or on the road, with consistent security policies.

Built on SD-WAN

Your locations and connections run as one network that sends traffic over the best path.

One provider for network and cybersecurity

The team that runs your network also manages its security, with one number to call. US-based support team. First reply within 60 minutes.

What we provide

Network

- SD-WAN
- Secure remote access
- Managed firewall/router

Protection

- Cloud-delivered security
- Consistent security policies
- Web and DNS filtering
- Network monitoring and 24/7 support

Devices

- Mobile device management
- Endpoint monitoring
- 24/7 US-based support

How it works

Free security consultation

We look at how your locations and staff connect today, ask a few questions and share general recommendations.

Agree on the scope

We propose a SASE plan for your locations and staff, with the services and support set in your service agreement.

Managed around the clock

We monitor, update and support the service, with 24/7 support from our team in the United States.

Book a free security consultation

We look at how your locations and staff connect today, ask a few questions and share general recommendations. Hands-on work is scoped in the plan we propose.
