5×5 TELECOM
INTERNET, CYBER, EDGE AI & MANAGED SERVICES

Solution brief · Managed SD-WAN

Managed SD-WAN for business

5x5 Telecom links your offices and internet connections into one managed network that sends traffic over the best available path, so key apps stay fast and online.

Why businesses choose 5x5

Online when a connection fails

If one connection has a problem, traffic moves to another, so work keeps going.

The connections underneath

Run SD-WAN over 5x5 dedicated internet, fixed wireless, and 5G and 4G LTE, installed in days, not weeks or months.

Support that answers

US-based support team. First reply within 60 minutes.

What we provide

SD-WAN

- Best-path routing
- Automatic failover
- Multi-location networking
- SD-WAN monitoring and management

Connections

- Dedicated internet access
- Fixed wireless, with the same SLA as our fiber service
- 5G and 4G LTE service
- Business Ethernet transport (point-to-point)

Security

- Managed firewall and router at each location
- SASE for the same protection wherever staff work
- For SLA-backed services, we commit to at least 99.999% network availability, subject to the SLA.

How it works

Tell us about your locations

Share your addresses, the connections you have today and the apps that matter most.

We design and install

We propose the connections and SD-WAN setup for each site and confirm the installation schedule with your quote.

Managed around the clock

We monitor the network and handle changes, with 24/7 support from our team in the United States.

Get a free custom quote

Send your addresses with a quote request. Quotes are free with no obligation, and we confirm service at each location.
